Chorus:

In my dreams I can see your face
I wanna hold you
Feel your embrace
I wanna love you
Love you all over again
All over again

Roger:

Girl since I've been on my own
Every night lying in bed alone
Thinkin' of you and all the love we shared
Looking back I don't know why I got scared
I had it all but now your love has gone
So baby let's go back to where we started from

Repeat chorus

Phil:

When I walked out on you
I knew what I did was so wrong
Can't believe what I done
Confused was my mind
Issues clouded my eyes couldn't see
All I needed was your lovin babe
But now I know the mistake I've made
I'm ready to love you
Love you all over again

Repeat chorus

Lee:

I had it all but now your love has gone
So baby let's get back to wheer we started from

Repeat chorus
