I've been watching and waiting and it won't be long
I've been living and learning and it won't be long
I have come to my senses and it won't be long
Brace yourself companheiro's the road is long
I've been watching and waiting and it won't be long
I've been living and learning and it won't be long
I have come to my senses and it won't be long
Brace yourself companheiro's the road is long,

We must be strong
Time has come for those to pay
I've been watching and waiting and it won't be long
I've been living and learning and it won't be long
I have come to my senses and it won't be long
Brace yourself companheiro's the road is long
Softly, I'm empty
Softly, I'm fading away
