If hello could only drop it's "O"
And it stayed in the front door's way
Of your home, would you live there still?
Could that make you everything I hate?
Wait...

Do you remember why you did it? (No, I don't)
Do you remember why she left?(I, do-o)

No, I hope you die right now
Will you drink my chemical?

Is there price to burn this paradise?
Where you left all parts that hurt to mend
If I don't stay awake
Will she come here again?
For my wish of only one last kiss

Do you remember why you did it? (No, I don't)
Do you remember why she left?(I do-o)(x2)

No, I hope you die right now
Will you drink my chemical?
And If you cry out loud
It'll only make me feel too good(x3)

Once upon your dead body
