"I, Robot"

Visit "I, Robot" on MotoLyrics.com

In our days we formed insignias
The passing glands unstamped
We've rendered ourselves powerless, fortunate
The useless mend the fixed
And on every hour it detonates
My courage goes unlooked
The ride home through parulis
The land it goes, I will...

You've been a bad boy
You broke all the rules
You've been a bad boy
You'll get yours paid in full

I, robot will never die
My robot will never die
You look down but far from out
And the pain, the reeds, you lose
I, robot will never kill

A favor captain, a word with you
My systems gone and lost its mind
My right eye has done shed a tear
My gun I've left behind
Systems take me home and dissemble me
Will I be terminated with you near?
Along side the others that I hold so close
If I'm to be killed, then when? by who?

You've been a bad boy
You broke all the rules
You've been a bad boy
You'll get yours paid in full

I, robot will never die
My robot will never die
You look down but far from out
And the pain, the reeds, you lose
I, robot will never die
