Girl I know you are bad and you know that you can have it
Any... that you want it got swag get you this to get you that
No no no got me thinking back to the moments that we have
How we used to love I want it all back
I want it all back cause I have been missing you and me
We have crazy chemistry thought we can work it out
Let me tell you even if it treats you bad you can call me anytime
I am the one that is on your mind cause I am doing it right
You ain't got to... ain't no second guessing I am the one who is on your mind
Ain't no others like me like me like me like me like me like me
Do it like me like me like me ain't nobody doing it like me
You don't have to ask you already know you are the girl that I want
You are the girl that I want got them all that but the doings... is not my fault
Cause I can't get away can't do without you
Thank lord that I have found you
Now you come like the wind. my imagination
Cause I have missing you and me we had... chemistry

All you got to do is just let me know
Even if it's late at night you can call me anytime
I am the one that is on your mind cause I am doing it right
You ain't got to... ain't no second guessing I am the one who is on your mind
Ain't no others like me like me like me like me like me like me
Do it like me like me like me ain't nobody doing it like me
