Visit "[There's Something About Her](#)" on [MotoLyrics.com](https://MotoLyrics.com)

There's something about her  
I can't live with out her  
There's something about her  
That I love

There's something about her  
I can't live with out her  
There's something about her  
That I love

She doesn't know  
Words can't describe she's the one  
She doesn't care  
She's the one that I need

There's something about her  
It's tourture without her

There's something about her  
That I love

She doesn't know  
Words can't describe she's the one  
She doesn't care  
She's the one that I need

There's something about her  
I can't live with out her  
There's something about her  
That I love

There's something about her  
I can't live with out her  
There's something about her  
That I love
