### "A Suicidal Sickness"

Visit "[A Suicidal Sickness](#)" on MotoLyrics.com

A fervent rain invades the planet  
And let us inhale the insufferable winds  
The inner tragedy ends in pain  
Seeking the scorn in our burning faces

In a span of anguish time stands still  
Perennial visions of horrible dreams  
The inner despair burns in our minds  
Soon we shall suffer eternal and blind

Now this world will bleed forever  
Our destiny calls to strike us dead  
A time for war is everytime  
Mankind in suicidal sickness

A new creation of evil  
Diminution from decay  
Cold ashes reflecting sorrow  
Evolution in dismay

The fragile future  
Is one with frustration  
That leads our journey  
Into termination

A new creation of evil  
Diminution from decay  
Cold ashes reflecting sorrow  
Evolution in dismay

The fragile future  
Is one with frustration  
That leads our journey  
Into termination
