Oh, my eyes are red, how am I supposed to put my photos on facebook?

Yo, I hear you got a problem

Yo I'm CMYKilla, I'm here to answer your prayers,  
So import that shitty photo, open up a new layer.

When it comes to red eyes, I know just the fix  
Back your ass up and let me channel mix

You know that R G B are the colors we're slidin'  
Now knock that Red back till' the sucker be hidin'

Set our hues, green and blue up to fifty percent  
Now we're through, let's review our color adjustment.

Hey what's wrong with my picture? You made it all grey!

Crop that tongue, motherfucker, listen what I say.

Select your layer mask, now we're on the right track  
Whip that paint bucket out, fill it up with black.

HOLD UP here's a tip for adobe elite  
If you want a quick fill, press ALT DELETE

But it looks just the same!

Yo, shut up, fool!  
No talkin' while I'm shoppin', that's my number one rule

Now get yourself a brush, make it soft and white  
and dab away that red till it looks all right.

Wow, that looks great Killa! Thanks!

Yo, no problem. Now let's fix these weird eyes on your girlfriend here.

No, that's alright, they're... they're supposed to be like

that.

Oh, this is going to be the worst church bake sell ever  
I want this stupid text popped  
Oh, an urba

Yoh, did I hear someone's layout was busted?  
Slide me that mouse, 'cause I'm here to adjust it.

Seems like your font is looking pretty grim  
You want to make that text shine like custom rims?  
Sure, where do we start?

Yo, that depends,  
open up layer styles, say hello to my friend.

Yo I'm Master Bevel,  
I'm way past your level  
My contour's better on your letters  
Makes them less disheveled

Since you just a beginner  
we'll set the bevel to inner  
Slide the depth right a step  
shading shift like a winner

Almost done, don't choke, throw on an outside stroke

Make that text leap out like it was provoked

Then I set my drop shadow at two thirds opacity!

Yo, your mastery is growing but not yet at capacity.

Your distance should be high with your size set low  
and the spread between them slides right to zero

Now this bake sale flyer's looking chrome as shit!

Better take that bitch to Kinkos cause it's ready to  
PRINT.
