Vast fields of ice prevailed by gloom  
Still they flicker in relentless storm  
Echoes resound through the years  
Silent screams that will never leave

Spheres of chaotic reign  
Beyond sleep - bereft of life  
Escape the earth through nebula  
Enter the mind

Walking through the seasons unchanging  
You saw the autumn long time ago  
Winter's grasp choked its' quiet roots

Lying dead beneath the snow

Were you ever here at all  
Absurd of absurdities  
Now close yourself within unending sleep

Floating among angels of blood  
Gargoyles chanting in circles of stone  
Enter disappearance and blankness eternal  
Gargoyles chanting in circles of stone  
Beyond time
