I CAN FEEL YOU

(Words and Music by Columbia Chaaise)

When I first met you

I was just a fool

caught up in any lovers game

driving me insane

but now since baby

I have you..ooh. yeah

i can tell the world

yes I can..

I now can stand for love

cause I know the difference

cause I feel you...

My love I can feel you

and you can feel me

your love you can feel me too

we are both feeling eachother

we're both going through

the same thing

I can feel you

my love I can feel you

and you feel me
your love you can feel me too
and I heard from another
that's the way love should be
We are both feeling each other
we are both going through the same
thing
I can feel you
and you feel me
I know you can feel me too
and I heard from another
that that's the way love
should be
oh...yeah...and when
darkness tries to come
and interrupt our fun
it wont me a damn thing
no it wont
mean a ding ding dong
chicky babe
Cause I vow to love you
no matter if the skies
are bright yellow
or one day turn on us
I'll still be faithful cause I...

cause I can feel you
my love I can feel you
and you can feel me
your love you can feel
me too
we can both feel each other
one another
we're both going through
the same thing
I can feel you
my love I can feel you
you can feel me too
your love you can feel me too
and I heard from another
that's the way love should be
feeling you always
you got it all baby
just like that
yeah..cause baby your're all that
