"Clash With Society"

Visit "[Clash With Society](#)" on MotoLyrics.com

The wish of selfdestruction
Forbidden by society
The search for perfection
Try to use your positive energy

Things you had to put up with
The foreclosure of your dreams
Abandon the frustration
Forefill your basic needs

You'll have to learn to drop
the burden you're carrying with you
You'll have to look at the world
the way you want to see it
The things your parents told you
don't always seem right to you
You just have to live your life
the way you've always wanted to

Recover from your wounds
You caught on your way here
Facing your opponent
Sometimes makes it all clear

It's just a clash with society
A society that bends everyone to its will
It's just a clash with society
A society that leaves many dreams to forfill

You'll have to learn to drop
the burden you're carrying with you
You'll have to look at the world
the way you want to see it
The things your parents told you
don't alwyas seem right to you
You just have to live your life
the way you've always wanted to
