Ring the living bell
Ring the living bell
Shine the living light
Shine the living light
Ring the living bell
Ring the living bell

RING THE LIVING BELL

Been celebrating 'way too long
'n' I've been drinkin', I'm ashamed to tell
Still feel thirsty
God I want to drink the water from the well
Still feel thirsty
God I want to drink and ring the living bell
Ring the bell, ah
Ring the living bell
Still feel thirsty
God, I want to give and ring the living bell

I'm not a magic lady
But I want to sing to help the light
Descend on the earth today
Because it's gonna get dark tonight
Sing the light, ah
Sing the living light
Still feel weak, but God,
I want to give and shine the living light
Still feel weak, but God,
I want to give and shine the living light

Been walking down the street all night
'n' I been feeling kinda cold
Still feel naked
God I wanna be warm before I get old and I'm cold
Ah, an' I'm feeling cold
Still feel hungry
God I want to give and ring the living bell
Still feel hungry
God I want to live and ring the living bell

Been celebrating 'way too long 'n' I have eaten much
too well
Still feel hungry
God I want to give and ring the living bell
Ring the bell, ah
Ring the living bell
Still feel hungry
God I want to give and ring the living bell
Still feel hungry
God I want to give and ring the living bell
Still feel hungry
God I want to give and ring the living bell
Ring the living bell

SHINE THE LIVING LIGHT (Reprise)

Ring the living bell, ring the living bell
Shine the living light, shine the living light
Ring the living bell, ring the living bell
Shine the living light, shine the living light
Ring the living bell, ring the living bell
Shine the living light, shine the living light
Ring the living bell, ring the living bell
Shine the living light, shine the living light
Ring the living bell, shine the living light
Shine the living light, shine the living light
Ring the living bell, ring the living bell
Shine the living light, shine the living light
