"So Proudly We Hail"

Days full of emptiness, nights full of pain
Destruction, battery, it's all in the game
One thought, so proudly we hail
The American dream, ev'rything's for sale

Com'on boy, better stop crying
The world isn't gone yet
Anotehr corner, another life
Our destination isn't set

A society of rape, action is reaction
I've tried, but can't get no satisfaction
The world we created, it's so fucking shit
Superalchemy, try to use your wit

Well boy, wear your army boots
Our future depends on you
Burn it, the American flag
That's all you gotta do

So boy, they got you wearing irons
At least you showed your power
We'll be fighting for peace
Untill our darkest hour
