

## **Comatose Vigil "Mirrors Of Despair"**

Visit "[Mirrors Of Despair](#)" on MotoLyrics.com

I stare into my face  
We are connected by solitude  
Together tied in chains of despair  
Not a gleam of... Hope...

Mentally enslaved nameless  
Having no future and no past  
I look at myself from the surface of a black lake

[X2]  
Mirrors call  
Mirrors melt  
Mirrors take me out of here

What the silver moon sings about  
In eternal collapse at night  
What I am looking for in the empty skies  
(Empty like me)  
A Swallow of freedom sticks in my throat  
When the sun goes down  
In the mirrors of despair  
There is only my face
