I'm sick of all these kids I see,  
They don't make no fucking sense to me  
All they care about is bands from the U.K.  
They think they're so fucking punk,  
But their eyes are closed and their minds are shut  
They don't know shit about the bands from the U.S.A.

[Chorus]

Whatever happened to the American bands  
Some how they've been lost  
If it's not from U.K. 82  
These kids today don't give a fuck

Now don't get me wrong, I like a lot of British stuff  
I love Alien Sex Fiend, Napalm Death, and GBH  
But what about the bands like Channel 3, Zero Boys,  
and M.D.C.  
All the great bands that came from the United States

[Chorus]

When you dance the same and dress the same  
It won't be long til you are the same  
You look the same and act the same  
There's nothing new and you're to blame  
This is America not the U.K.
