Once I needed your love

But that was just one thing left on my mind

Then I needed to feel you near me

You said:"don't have the time."

The cowboys at the rodeo

The rhine-stones on that romeo

Your theme tune on the radio

Souvenirs that only go to

\_ chorus:

Show me, show me

Show me that your mine

Show me, show me

Give me just one sign

Show me, show me

Second that emotion

Show me, show me love

Since we're skimming the surface darling

Now's time to get in deep

You've opened up the envelope

But there's still one secret you keep

A pirate station or the late night show

A sunken ship with a rich cargo

Buried treasure that the four winds blow

Wind and rain it only goes to

\_ chorus

Some things are hidden

Some things you'll see

Make me know

Signal to me

Nine out of ten, in every case

She might look pretty but there's make up on her face

Show me, show me love

And you can be free

And you could be free. free. free.

Where are the diamonds?

Where are the curls?

Where are the things that you took from this world?

These are the diamonds

These are the curls

These are the things that you took from this world
