Intro

Inhale with your ears

Exhale with your mind

Inhale with your ears

Exhale with your mind

Up we go but we're right here

Down we go but we're right here

Heaven we win but we're right here

In hell we lose but we're right here

REPEAT INTRO

Everything's heaving underground you see

But the music from you rob, dave and steve

Oz went with floyd but i don't know why

Jimmi you're excused while i kiss the sky

Chorus

It's gonna rain

I see the sun again

That's time to grow my friend

I know you jones cause i've been there

The kids are cool cause they don't care

Tarentino showed a soul get saved

Propt to the man for insight he gave

So up we go but we're right here

Down we go but we're right here

Heaven we win but we're right here

In hell we lose but we're right here

Chorus

REPEAT INTRO
