You said I laid down easy
Trusted what you said
Lead you right into me
Knew that I was ready
Begin at the beginning
Before you broke my heart
I can't believe we finished
Something that we didn't start

I can't believe it's over
See for yourself
I can't believe it's over
There's nothing there
See for yourself
There's nothing there
See for yourself

Look at all the damage
That we didn't heal
Love's an empty language
If you never feel
I try to make it better
Every single turn
Such a simple lesson
I guess we'll never learn

I can't believe it's over

See for yourself
I can't believe it's over
There's nothing there
See for yourself
I can't believe it's over
See for yourself
There's nothing there
See for yourself
There's nothing there
See for yourself
