

Contagion "We Believe"

Visit "[We Believe](#)" on MotoLyrics.com

Please God please Jesus
It's time please leave us
Please God release us
It's time to unleash us
They believe but we question
Are they naive are we predestined
Demonseed to teach the lesson
Of destiny before conception
Do we believe
It's my religion

Do we believe
It's my decision
Please God please Jesus
Save your prayers please don't deceive us
It's my life it's my religion
It's my right to my decision
There's got to be a better way
You lied to us but still we pray
