This moment is perfect, fixated
I'm never wanting to leave your eyes are breath-taking
Shyly turning away
You can't hide that smile so easily
Come back to me
My hand brushes your cheek (x2)
Fall into my arms I will hold you (x2)
You'll never be alone again
Our eyes are fixated
Can't turn don't let me blink
To miss even a moment
I can't handle that
Palm to palm our fingers interlaced
My lips on your hair that smile from ear to ear

My cheek is pressed upon yours (x2)
Fall into my arms I will hold you (x2)
You'll never be alone again
Ooooooooooooooh
Ooooooooooooooh
Ooooooooooooooh
Angels sing around us now
Ooooooooooooooh
Angels sing around us now
Fall into my arms I will hold you (x2)
Please fall into my arms I will hold you
You'll never be alone again (x2)
No you'll never be alone again
