Cooter
"About You"

It was always obvious
What was between the two of us
I was with you all the time
Everything that I adore
No girl could have anymore
But now you're never around
So I've been

Wasting all my time without you
And spending all my days without you
I know sometimes that
It doesn't work that way
I always like to think
That you'd be back someday

It's something in the things you do
That make me so in love with you
I see how you act with me
And if you weren't with him for so long
I wouldn't have to write this song
I wish it was me you met all those years ago

That's not the way some things go
I should have been the one you got to love and know
