

Copper "Conversation"

Visit "[Conversation](#)" on MotoLyrics.com

How long have I been awake
Because it's so much better
How long have I been asleep
And under the weather
You can see it in my eyes
Because it's so much better
How long have I been awake
Because it's so much better
Even now there's conversation
Even now she speaks
Even now there's conversation
Even now she speaks
How long will I sit and wait
Or does it really matter
How long will I hesitate
To think, to forget her
Oh you fail to realize
And will you ever
How long have I been awake
Because it's so much better
Even now there's conversation
Even now she speaks
Even now there's conversation
Even now she speaks
Words can't deny
Only time
Try harder
For me
Even now there's conversation
Even now she speaks
Even now there's conversation
Even now she speaks
