Inside and out you speak to me  
But I'll never ever have the nerve to say it  
Inside and out you speak to me  
And I'm living with another chance to face it  
How can this world be so round  
And I'm just the one in the middle  
When everything seems so wasted  
Something will give  
Take your time  
And I won't run away thinking it's fine  
I won't  
I won't  
I won't understand  
Inside and out you speak to me  
But I'll never ever have the nerve to say it  
Inside and out you speak to me  
And I'm living with another chance to face it  
How can this world be so wrong  
And I'm just confused in the riddle  
When everything seems so wasted  
Something will give  
Chorus  
Inside and out you speak to me  
Inside and out you speak to me  
Inside and out you speak to me  
Inside and out you speak  
Chorus  
Why am I always around  
Why am I always put down  
When even the words are rolling  
How will I know
