"Where We Started"

Visit "[Where We Started](#)" on MotoLyrics.com

We always fail to say what's on our minds
Holding us closer to the things we've left behind
Who would think that it would take this long
You're fooling yourself pretending nothings wrong
To have it all
And not relate
To have it all your way
Its about where we started and what we became
Ever changing but we stay the same
Sing it again sing it again until it's over
Sing it again sing it again until it's over
Changes wash upon your open shore
Tell me what it is you're searching for
Your painted walls they always serve you well
Supporting you conscience if you ever fell
To have it all
And not relate
To have it all your way
Its about where we started and what we became
Ever changing but we stay the same
Sing it again sing it again until it's over
Sing it again sing it again until it's over
