

## **Coptic Rain** **"First Wave"**

Visit "[First Wave](#)" on [MotoLyrics.com](https://MotoLyrics.com)

Yesterday lies are colliding  
I wish to love now but you're dying  
Don't you know we're closer to the ascension than ever  
before  
We have to learn how not to hate we can't go further no  
more  
Should I be glad to have  
A new soul family  
To be someone twin flame of another star seed of fifth  
D reality  
Leave wondering this mind out into a sheltering sky

Don't see don't feel you near me just sounds to know  
you shine  
Don't you know we're closer to the ascension  
Than ever before we won't go any more further this is  
the final shore  
Should I be glad to have  
A new soul family  
To be someone twin flame of another star seed of fifth  
D reality
