whats a soul go for these days  
what would these shambling social mutants pay  
politically and religiously lobotomized  
deluded that this is life

I will never Ever  
submit to this  
this is not life this is an aboration

Programmed reactions from retarded faces  
drowned in hallucination

cannabalistic christain locusts  
wallow in thier insect lust  
can no one imagine a more inspired future  
that sterile white claustrophobia  
or nuclear annhilation

I can't help but wonderin  
have I seen the last man  
or was it his disembodied legs  
I dreamed of so long ago
