"She's Comin' Around"

This town's on fire
But the world,
It don't make a sound

Her golden hair
Lights the sky,
When she's comin' around

She's on the outside,
I'm lost in the crowd
She's on the inside, now
She's comin' around
She's comin' around

But she's a stranger to me now

The moon hangs high
And the wild night
Comes out to play

Was it a dream,
A wish,
Or something I couldn't say?

She's on the outside,
I'm lost in the crowd
She's on the inside, now
She's comin' around
She's comin' around

But she's a stranger to me now

Is she lookin' for somethin'?
Somethin' that can't be found?
Look in the mirror, now
She's comin' around
She's comin' around

But she's a stranger to me now.
