So-long to good old yesterday  
It's been real but time will not stand still  
So-long to good old apathy  
It's been real but now you see that all this is dead

You'll see  
Its everything... you'll never be  
You'll see  
Its everything... you'll never be  
This time  
It's you it's me it's everything you'll never be  
This time  
It's you it's me it's everything you'll never be

So-long to all these little games  
It's been fun but look at what it cost  
Sit back and find another way  
To live life like it's not only hiding from shame
