They all talk of unity from the problems we face
everyday why should we encourage what's just talk any
way your impulsive jealousy where's the so called unity
you mentally untrusting and definitely not inspiring
resume your place among this mess the wisest of the
rest the knowledge you'll never possess compensated
for single mindedness bored with life you turn to test
battle ground for pettiness pick at flies to justify
tempers raised you wonder why? Why? It's totally
unacceptable come support God's scene it's just
another target harassed to the extreme
