

Corrs "Say"

Visit "[Say](#)" on MotoLyrics.com

Gone are the days when I was young and free
The future I can't see
Gone are the days of precious love
Relied on, and leaned on
So many days of sleepless nights
By your side
And why oh why
I never thought that it would be like this
My first love the last time

But if he say say says that he loves me (say that you
love me) I can cry, I can smile
But if he say say says that he needs me (say that you
need me)
There's a light, there's a light
A light for me

Say...

So many things that I would like to say
But he took you, took you away
So many things I'd like to ask
It's no good, 'cos you're not here
I hear your voice (I hear your voice...) I see you laugh
And if only you were here
You see the night and I the day
But sometime we'll walk away

But if he say say says that he loves me (say that you
love me) I can cry, I can smile
But if he say say says that he needs me (say that you
need me)
There's a light, there's a light
A light for me

(Never want to feel that way again
That again
Never wanna feel that again

Lean on, gonna rely on
Don't leave me, don't leave me
Lean on (lean on), gonna rely on (rely on)

Don't leave me (leave me), don't leave me (leave me)
Lean on (lean on) Gone are the days when (gonna rely
on (rely on)) I was young and free
(Don't leave me (leave me), don't leave me (leave me))
(Lean on (lean on) Gone are the days of (gonna rely on
(rely on)) precious love
Relied on (don't leave me (leave me)), and leaned on
(don't leave me (leave me))

But if he say say says that he loves me (say that you
love me) I can cry, I can smile
But if he say say says that he needs me (say that you
need me)
There's a light, there's a light
Yeah, if he say say says that he loves me (say that you
love me) I can smile
But if he say say says that he needs me (say that you
need me)
There's a light, there's a light

A light for me (say...)

(So many things I would like to say but he took you
away, took you away
So many things I would like to add, he took you away,
took you away
Say...
Say...
Say...)
