Well I should never ever have met her
But now its leather jacket weather

I thought the adrenaline rush
Must mean that yer my type
I thought that id seen god
And it turns out I'm right

I never had a kiss feel better
And I used to laugh at this, remember
We spent the summer nights together
But now its leather jacket weather

I confess initial distress
At your lack of a blatant come on
I thought "she must be gay"
But it turns out, unh unhh

I never had a kiss feel better
I should have never ever met her
We spent the summer nights together
But now its leather jacket weather
Yeah its leather jacket weather.....UH HUH!

Yeah I thought the adrenaline rush
Must mean that yer my type
I thought that id seen god
And it turns out I'm right

I never had a kiss feel better
And I used to laugh at this, if you remember
We spent the summer nights together
But now its leather jacket weather

Yeah its leather jacket weather
I should have never ever have met her
But now its leather jacket weather
