So here we stand, in our secret place /  
Where the sounds of the crowd  
is so far away/ And you take my hand,  
And it feels like home / We both understand /  
It's where we belong / So how do I say,  
Do I say goodbye / We both have our dreams /  
We bouth wanna fly / So lets take tonight /  
To carry us trought / The lonely times

Chorus

I'll Always look back, As I walk away /  
This memory will last for eternity / And all of  
our tears will be lost in the rain / When I find  
my way back to your arms again / But until that  
day you know you are / The queen of my heart

So lets take tonight, Never let go / While dancing  
we'll kiss like there's no tomorrow / As the stars  
sparkle down, Like a diamond ring / I'll treasure  
this moment 'till we meet again / But no matter how  
far / Away you may be / I just close my eyes and you're  
in my dreams / And there you will be / until we meet

Chorus

I'll Always look back, As I walk away /  
This memory will last for eternity / And all of  
our tears will be lost in the rain / When I find  
my way back to your arms again / But until that  
day you know you are / The queen of my heart

Chorus

I'll Always look back, As I walk away /  
This memory will last for eternity / And all of  
our tears will be lost in the rain / When I find  
my way back to your arms again / But until that  
day you know you are / The queen of my heart
