I've had big dreams come true and I believe in  
Angels although I can't see them  
They're watching over everything I do  
Ain't no easy street around the bend on my road  
No pot of gold at the end of my rainbow  
But I don't mind cause baby I got you

Chorus:

The rain keeps the flowers from dyin'  
The sun lights the world when it shines  
The midnight sky has a blanket of stars and a moon  
And baby I got you

I can't imagine one day without you in it

Life alone just wouldn't be worth livin'  
Love would be a wish that never came true  
Lord knows I've got more than I deserve  
But I don't question the prayer that I've had answered  
I did something right cause  
Baby I got you

Chorus x 2
