"How"

Visit "[How](#)" on MotoLyrics.com

Look, you're standing alone (Standing alone.)

How ever I should have known, (I should have known.)
Never before, never again,
You will ignore, I will pretend.
Never before, never again,
You will ignore, I will pretend.

In your world, you're alone in your face.
You're alone in your world, you're alone in your face.
How you said you never would leave me alone, oh.
How you said you never would leave me alone.

Now you're just walking away (Walking away),
When you said you always would stay (Always would stay.)
Never before, never again,
You will ignore, I will pretend.

Never before, never again,
You will ignore, I will pretend.

In your world, you're alone in your face.
You're alone in your world, you're alone in your face.
How you said you never would leave me alone, oh.
How you said you never would leave me alone.

Never before, never again,
You will ignore, I will pretend.

In your world, you're alone in your face.
You're alone in your world, you're alone in your face.

How you said you never would leave me alone, oh.
How you said you never would leave me alone
