Even in a perfect world
Living in a perfect world
Giving in a perfect world
Brown eyes I should trust you
Green eyes tear things apart
Blue eyes put it back together
Staring sadly at the looking glass
Try to erase something from the past
Trying to fill the void in your soul
Well there's a light at the end of the road
And there's a star hanging over the sea
And when we get there we will be one
Just wait and see
Yeah there's a light at the end of the road
And there's a star hanging over the sea
And when we get there we will be one
Just you and me
Even in a perfect world
Living in a perfect world
Giving in a perfect world
Generation playstation
Information super-highway
My way or the highway
Brown eyes I should trust you
Green eyes tear things apart
Blue eyes put it back together
Well there's a light at the end of the road
And there's a star hanging over the sea
And when we get there we will be one
Just wait and see
Yeah there's a light at the end of the road
And there's a star hanging over the sea
And when we get there we will be one
Just you and me
Even in a perfect world
Living in a perfect world
Giving in a perfect world
Even in a perfect world
Living in a perfect world
Giving in a perfect world
