It seems like we've been lovers since the start of time
This kind of do or die don't happen overnight
It would be an understatement to say
I'm obsessed
Since I live and breathe for your touch girl

I'm more then just a little
More then just a little in love
I'm more than just a little
More then just a little in love

I carved your name on the sycamore in my front yard
I got your picture taped to the dash of my car
You can say that my behavior's adolescent at best
But this ain't no school boy crush girl

I'm more then just a little
More then just a little in love
I'm more than just a little
More then just a little in love
More and more I'm less and less
Inclined to hold my feeling's back
And I've got love that's in excess
Of anything your heart could (ever)ask

It would be an understatement to say
I'm obsessed
Since I live and breathe for your touch

I'm more then just a little
More then just a little in love
I'm more than just a little
More then just a little in love
