Since The Day That I Met You

Who knew, on the day that I met you
Love would lead us to this place and time
My heart from the first we were apart
Knew that you were just the perfect bride

(Chorus)

The sun shines a little brighter every day
Sit right here besides me
I got something to say

When I felt your touch, I could feel forever
and I knew you felt it too by the way you held,
Held me in your arms
When there's nothing left to prove
and it been this way since the day that I met you

Did you after all that we been through
imagine that our love it would survive
It's true there's nothing I would not do
to keep this burning flame in us alive
(Chorus)

The sun shines a little brighter every day
Sit down here besides me
I got something to say

When I felt your touch, I could feel forever
And I knew you felt it too, by the way you held,
Held me in your arms
When there's nothing left to prove
And it been this way since the day that I met you

When I felt your touch, I could feel forever
And I knew you felt it too, by the way you held,
Held me in your arms
When there's nothing left to prove
And it been this way since the day that I met you
Since the day that I met you
