A simple little lie. and I believed you. closing of your eyes. and fall asleep. I could leave tonight. you won't even notice. drive straight to the airport. a simple transaction. I lie awake you lie asleep. I dream of paris. the thought of a better day. just knocks me off my feet. maybe I'm crazy. but I know you're faking. just do me a favor. no explanation. desperate pleas for your hand. just a cold shoulder. that's all you offer me. it knocks me off my feet. paris on a good day. I might just fall in love. my life I'm over it. I wait for the better days. why do you want my sanity. I wait for the better days
