

Cross My Heart "The Great Depression"

Visit "[The Great Depression](#)" on MotoLyrics.com

I always play the fool. I'm this years' nominee. falling
backward wasn't so hard. try to remember remember.
but that was a long time ago. wear your mind. raise
your glass. try to remember. where you're at. try to
remember. where you're at. try and try. you tell me that
love won't break your heart. I'll tell you yeah you live
forever. in a lie you'll never see. say there's nothing to
be afraid of. that there's nothing really there. but that
was a long long time ago. raise your glass. raise your
glass. to death the new revolution. to death the new
revolution
