I could never leave you  
Or ever see you go  
My life depends upon you  
My heart just couldn't stand the blow

I could never deceive you  
Hurt you or cause you pain  
My world evolves around you  
Without you I'd go insane

All I wanna do  
Is grow old with you

Roaring falls and rivers wild  
Guide water to sea  
From the day that we have first met  
You've been guiding me  
All our oceans couldn't survive  
Without this royal feed  
I'm endless like the sea  
As long as you're with me

In my life I've been around  
I've seen the come and go  
Once I was a wild one  
And I took my share of blows

But none of all those women  
Could ever compare to you  
You're the sun among stars  
For you I'd die - that much is true
