"Far"

Remember the last time (we've fallen, we've fallen)
When your worries past you by
A second chance, my last regret
Hasp my thoughts, let me forget
The curtains drawn, this show, no breaks
As long as there's no such thing as a friend
This show it never ends

Someplace far oh far away I'll be (apart and happy)
Someplace far oh far away you'll see

Let's desolate the halls of your old school
Or watch the night fade to it's blackest
From the roof of your own house
Bite your tongue you'll feel my pain
It's like the sun melted all of the stars away
