[I.]

Eldinaar returned  
And our faith with him  
Beasts of hell now die!  
In bright flames of pain -  
Glory of the axe!  
Glory of the sword!  
Evil dies  
On our eyes!

[II.]

Cutting the beast's throat  
Crushing his weak bones  
The earth drunk the blood  
The battle is won  
So calm down my friend  
It's time to go home  
Sleeping swords  
Battle lords

[Ref.]

Courage  
Will stay with us now  
Courage, no more fear  
We killed the death!  
Weapons  
Will take some rest now  
Sleep well, ohh my friend  
Have a steel dreams

[III.]

We don't even dare  
To forget your look  
Your might saved our lives  
Our holy brothers  
Until the next time  
When danger will come  
You will bite  
You will fight!
