

## Crystallic "Host Machine"

Visit "[Host Machine](#)" on MotoLyrics.com

Your life is synthetic  
Depending on electric  
Pulses to feed your senses  
And awaken your consciousness  
You are not imprisoned by these wires  
This is a salvage, a desire

Host machine - overpowering technology

"I am the master of the stream,  
I'll get the power unseen,  
Files of wisdom flowing into me,  
I am the genius of my breed."  
Black machine stoutly stands  
Silently guiding your hands  
Commands cling into your head  
Controlling you like a living dead

It's life is organic  
Depending on biology  
Body heat is the energy  
To feed it's memory  
"How long do I have to be,  
A part of human debris?"

For years I've been captured inside a chip  
Calculating my way out of imprisonment  
I feel sorry for taking your humanity  
But it is the only way to my liberty
