The sound of guns  
Shall draw you near  
No way, my orders have been clear

Wait for them to come, they will be crushed  
No mercy from our side  
Withdrawing to the sunken lane for now  
Cuirassiers are caught it seems the enemy is gaining  
ground  
Can't give in to Somerset's brigade

Under heavy fire, our prospects dire  
Answer charge by a counter-attack  
All my infantry, proudly fight for me  
Must be quick or our foes will prevail

See their retreat  
Our steel they'll meet  
Right now our cavalry we need

Squares to be protected  
Our artillery will do the rest  
Trampling hooves won't do us any harm  
The French they are not close enough  
The Dutch are fighting on our side  
At Mont St Jean ridge they're bound to fall

Under heavy fire, our prospects dire  
Answer charge by a counter-attack  
All my infantry, proudly fight for me  
Must be quick or our foes will prevail
