"No One Ever Tells You"

Visit "[No One Ever Tells You](#)" on MotoLyrics.com

When you're a little girl, the future looks so bright
No one ever tells you that it hurts to live
& things don't always have to turn out right

No one ever tells you 'bout love & how it can make you
cry
No one ever tells you how your heart can break
When someone that you love tells you goodbye

(instrumental)

& when the pain begins & the teardrops start to burn
No one ever tells you how it hurts to live
No one tells you you just live & learn

(drums, fading out)
