Impossible
its possible 'cause
the night seemed a little different
we were holding on to
this moment we'll soon miss
you were holding me tight as I gave in to your lips

Impossible
its possible that's what she said
no need to put pieces till they fit
it is true this ride was worth it

I thought how could something so true ever come my
way
Hard to believe but so true
I cherish the day I met you

Impossible
its possible that's what she said
no need to put pieces till they fit
it is true this ride was worth it

you're living proof that dreams come true
you're all that I wish for (x2)

Impossible
its possible that's what she said
no need to put pieces till they fit
it is true this ride was worth it
no need to put pieces till they fit
it is true this ride was worth it
