I knew
that there could be someone of my kind
But you
You were the best anyone could find

You're love make's me grow
now I just want to show that
I could do the same for you
But I promise you
I will take you through
I never ever let you down!

With you I am the man I won't to be
how you kiss me right into eternity
how the world is trembling when you touch me there
Give me the feeling of slowly diving into air

I feel
I got so much to blame the stupid pride
But this time I know
I am not letting go
I will always be there by you're side!

With you I am the man I won't to be
how you kiss me right into eternity
how the world is trembling when you touch me there
Give me the feeling of slowly diving into air
