"Up The Hills"

Visit "[Up The Hills](#)" on MotoLyrics.com

I can feel it coming
But I don't know why
All the people running
Up the hills to hide
All or nothing
Gonna go and save their life
But when you got nothing
You got everything to try

The sky went black
The middle of the day
The river ran red
And went the other way
They say it was hard to take it in
They say it was hard to take it in
Watching everything get blown again
Watching everything get blown again

You can't find a way to get help to you
But we can fly a man and land him on the moon
Drop of a hat let's go to war
7 years later don't even know what for
Your little black book won't help you now
But you still got your good old friend denial
Your good old, good old friend denial
Yeah your good old, good old...

Cause I can feel it coming
But I just don't know why
All the people running
Way up the hills to hide

I can feel it coming
But I just don't know why
All the people running
Way up the hills to hide

The water will keep on rising
And they won't be coming down
And the message will keep on climbing
In the search of higher ground

In the end, you don't need much
In the end, no, we don't need much
The tops of the hills were left untouched
The tops of the hills were left untouched

And you can't find a way to get help to you
But we can fly a man and land him on the moon
Drop of a hat let's go to war
7 years later don't even know what for
Your little black book won't help you now
But you still got your good old friend denial
Your good old, good old friend denial
Your good old, good old...

Cause I can feel it coming
But I just don't know why
All the people running
Way up the hills to hide

I can feel it coming
But I just don't know why
All the people running
Way up the hills to hide

Way up the hills to hide
Way up the hills to hide

The water will keep on rising
The water will keep on rising
The water will keep on rising
Rising
