Exchange a smile,
but that's where it ends.
you judge a character by how they choose their friends.
so i say fuck you to you and your crew!
i'm glad i've got nothing to do with you.
try to play it cool, but we don't give a fuck.
it's all a fucking facade, and we've had enough!

divided we fall over the clothes i wear.
go fuck yourselves, cause i don't care!
it's all who you know, it's all politics.
i'm through with your games, i'm through with your
shit!
try to play it cool, but we don't give a fuck.
it's all a fucking facade, and we've had enough!
