Visit "[Master Shadow](#)" on MotoLyrics.com

Welcome to the game, wake up from your destiny
Catch this reality hidden in your soul
A presence in my brain dragging me in the hollow
I fight against my shade I'm losing my control

Deceive your time and stay in the air to see
You lose your mind now you can't find peace

Master Shadow of Universe controls my destination
My senses dying in his system ain't find real dimension
... slave to a crazy game...

Welcome to your life, wake up front this tragedy
It's time to learn the truth disguised in a smiling world
All around my space I can feel the Master Shadow
I seek a logic mean... I fall in an endless hole

Deceive your time and stay in the air to see
You lose your mind now you can't find peace

Master Shadow of Universe controls my destination
My senses dying in his system ain't find real dimension
An unbreaking power will kill this flower giving
symphonies of war
It's a pure genetic failure, a deceit locked in my soul
... slave to a crazy game...

Wake up from your destiny... catch this reality...
I'm losing my control! I'm losing my control!

Master Shadow of Universe controls my destination
My senses dying in his system ain't find real dimension
An unbreaking power will kill this flower giving
symphonies of war
It's a pure genetic failure, a deceit locked in my soul
